

INTERNATIONAL CONFERENCE ON CHILD ROBOT INTERACTION

21-23 June 2023

Università degli Studi di Milano-Bicocca

The Conference will host research contributions on child-robot interaction, focusing on the methodologies, the technologies, the psycho-pedagogical applications, the ethical ramifications, the philosophical, social and cultural presuppositions and implications of this emerging research area.

It is organized by the University of Milano-Bicocca (RobotiCSS Lab), Università Politecnica delle Marche, INDIRE, Yunik.

The official language is **English**.

The **deadline** for submitting extended abstracts and proposals for symposia through EasyChair is **December 19th 2022**. See <https://cri.unimib.it/>

After acceptance, speakers will need to register to the Conference paying a registration fee.

All papers will be peer-reviewed. The Conference proceedings will be published in a volume edited by College Publications.
